

NOTICE---

2013 Flood Event Emergency Management Update

DEBRIS MANAGEMENT:

1. CONTAMINATED SANDBAGS—The Town has made arrangements to have Contaminated Sandbags picked up from the road right of way on

May 31, 2013.

The definition of Contaminated is any bag that has come in contact with the Lake or River waters during the flood event. Most of the laid bags have not been contaminated and are not considered hazardous waste.

- Please place contaminated bags (only) at the edge of your road right of way in a manner that makes it easily accessible for equipment to pick the bags up.

DO NOT PLACE ON THE ROAD!!!

2. ALL OTHER SANDBAGS SHOULD BE HANDLED At THE PROPERTY OWNERS DISCRETION. Some ideas are as follows:

- a. Store for next flood event (The bags last for years)
- b. Gardens
- c. Sand Boxes
- d. Shoreland fill for you or your neighbors(Check with Jefferson County Zoning for permitting requirements)
- e. Some of the farmland owners in the area have agreed to have the sand disbursed on their land if you would like to exercise that option.

3. DEBRIS

Burnable debris (brush, tree limbs, sticks etc.), should be burned by the rightful property owner (Burn permits are required) or taken to a brush/compost site of your choice.

Thank you for your cooperation- Town of Sumner Emergency Management

For further information call: 608-884-7925 or 920-650-3652—or -608-295-8291

Updates will be posted as conditions change.
